

CLARIFIER

For Swimming Pools and Spas

Restores sparkle to dull, hazy water

Clarifier is a high viscosity, high molecular weight, cationic polymer exhibiting aggressive flocculating ability in clearing cloudy water in pools and spas. It is specially formulated to help remove small particles from the water by joining them together and allowing it to be filtered. **Clarifier** restores the sparkle to dull looking water. This product helps minimize consumption of more costly chemicals.

BENEFITS

- ✓ **Produces sparkling, clear water**– Due to its excellent flocculating ability, clarifies and decolorizes low turbidity water by clearing wide range of particle size impurities suspended in pool water, thereby restoring the original sparkle to your pool water.
- ✓ **Begins working immediately and during pool use** – No waste of time waiting for settling after dosing.
- ✓ **Eliminates need to add other balancing chemicals** – Does not upset pH of water, thereby eliminating the need for balancing chemicals to alter pool chemistry.
- ✓ **Aids filter performance** – Increases filter efficiency by causing small particles to clump together.
- ✓ **Swim during treatment** – If used as directed, bathers will never know that the product is working while they enjoy their swim.
- ✓ **Preventative and cure** – **Clarifier** can be used to prevent cloudy water formation and as a cure for existing turbidity or cloudiness.
- ✓ **Increased value** - The added benefit of this product is that it is a combination flocculent and clarifier.

DIRECTIONS FOR USE

- ✓ Using a good test kit, balance your pool water to a pH of 7.2 to 7.6 and maintain free chlorine at 1.0 to 3.0 ppm.

FOR EXISTING CLOUDY WATER

SWIMMING POOL

- ✓ Backwash or clean filter following manufacturer's instructions.
- ✓ After backwashing, add ½ quart of **Clarifier** per 10,000 gallons of water, directly to skimmer.
- ✓ Add additional doses as necessary to clear water, allowing 24 hours of continuous filtration between additions.

HOT TUB OR SPA

- ✓ Backwash filter, add 1 capful per 200 gallons in front of water inlet for maximum dispersion.
- ✓ Repeat dose as needed to clarify water, allowing 24 hours of continuous filtration between doses.

MAINTENANCE DOSAGE

SWIMMING POOL

- ✓ After backwashing filter, add 4 fl oz. of **Clarifier** per 10,000 gallons, directly to skimmer.
- ✓ Repeat dose once-a-week.

HOT TUB OR SPA

- ✓ Backwash filter, add 1/2 capful per 400 gallons in front of water inlet for maximum dispersion.
- ✓ Repeat dose once-a-week.

AVAILABILITY

Clarifier is available in 1 quart bottles.
