

## PRODUCT INFORMATION

### **SUPER PRO SHOCK FOR SUPERIOR SWIMMING POOL OXIDATION**

#### **Importance of Sanitization**

Pools & spas are extremely vulnerable to illness causing bacteria or other contaminants introduced into the water by bathers. Although calcium hypochlorite is used primarily for chlorination, it is well suited for use as a sanitizer and disinfectant due to its effectiveness against bacteria, algae and other microorganisms.

**PROtech® Super Pro Shock** is a premium, multipurpose sanitizer which, when dissolved in water releases a minimum of 73% available chlorine. It functions as a shock and destroys the organic contaminants in pools, resulting in crystal clear water. When used as directed, this product provides effective bacterial and algae control in swimming pools.

#### **FEATURES**

- ✓ One pound shock treats 15,000 gallons – 50% more than regular calcium hypochlorite
- ✓ Quick dissolving
- ✓ Swim after 15 minutes
- ✓ Fast Acting with no residue
- ✓ Powerful shock treatment for a crystal clear pool
- ✓ Effectively kills bacteria, controls algae and destroys organic contaminants
- ✓ No risk of over stabilization
- ✓ Simple, easy and convenient
- ✓ Far less dusty than other hypochlorite products

#### **APPLICATION**

- ✓ Ensure all pool equipment is clean, works properly and pH levels are between 7.2 and 7.8.
- ✓ With pump running, broadcast 16 ounces per 15,000 gallons of water over wide area in the deepest part of the pool during the evening hours and ensure pump runs for at least 2 hours.
- ✓ Available chlorine level must be between 1- 4 ppm before re-entering the pool. Depending on water conditions, additional shock may be necessary.

**Note: Prolonged contact with pool surface may cause staining or bleaching.**

#### **Weekly shock maintenance:**

- ✓ Check and adjust pH levels.
- ✓ Shock treat using 16 ounces per 15,000 gallons of water. Additional shocking may be required depending on water conditions.

#### **Algae treatment:**

- ✓ When used properly, this product controls the formation of algae. However if algae develops, pour product as close to algae as possible.
- ✓ Use 16 ounces per 15,000 gallons of pool water.
- ✓ Immediately scrub affected area and vacuum through filter. Repeat if necessary.

#### **AVAILABILITY**

PROtech Super Pro Shock is available in 1 lb bags, 5 lb & 25 lb pails.
